RONAK KUMAR

Data Engineer

8 years of experience across domains in the data engineer

Bangalore

SKILLS

- Apache Hadoop
- Apache Spark
- Java
- Distributed Database
- Elastic Search
- HBase
- Duck DB

PROFILE

Data Engineering professional with 8 years of experience, specializing in cloud migrations, big data processing Proven track record in delivering high-impact projects, including a cloud cost reduction through efficient resource allocation. Skilled in Spark, Hadoop, GCP/AZURE, Elastic, and SQL, with expertise in multi-terabyte-scale ETL pipelines.

WORK EXPERIENCE

SENIOR DATA ENGINEER , WALMART GLOBAL TECH INIDA BANGALORE

FEB 2022 - Present

- Managed large-scale petabyte retail data using Spark and Java on Azure and GCP cloud platforms.
- Designed data flow orchestration in Apache Airflow, enhancing workflow efficiency.
- Created automated CI/CD pipelines to streamline deployment processes.
- Migrated Azure-based Big Data systems to GCP, reducing project costs from 18 KPD to 8 KPD.
- Provided technical support for data processing and storage issues, ensuring system integrity.
- Processing 500M+ item-store combinations across 11,000+ stores using Apache Airflow, BigQuery, and Spark.

DATA ARCHITECT , GLOBANT INDIA PRIVATE LIMITED

Sep, 2021 - Feb, 2022

- Served as ETL developer for GBA product (Global Brand Analytic).
- Engineered Talend-based ETL jobs for raw data transformation.
- Monitored ETL processes, ensuring efficient operation with minimal errors.
- Collaborated with cross-functional teams to optimize data workflows.
- Implemented performance tuning strategies to enhance data processing speed.

LANGUAGES

- English
- Hindi

EDUCATION

Bechlor Of Engineering in Computer Science

LNCT Group Of Colleges Bhopal

Jan, 2013 - Sep, Jan, 2017

SENIOR DATA ENGINEER, JIO PLATFORM LIMITED

Jun, 2018 - Sep, 2021

- Analyzed requirements from stakeholders to translate business needs into technical specifications.
- Designed and implemented scalable data processing solutions using Apache Spark and Java.
- Built and optimized data pipelines for efficient handling of 60-70 terabytes of data across various schedules.
- Conducted regular testing and validation to ensure data integrity before production deployment.
- Provided ongoing technical support and troubleshooting for data processing and storage challenges.

DATA ENGINEER, INNOEYE TECHNOLOGY

Jun, 2017 - Jun, 2018

- R&D on new API's provided by Apache. Experienced in Implementing spark RDD, DataFrame and Dataset.
- Responsible for Writing new Spark Jobs for requirement. and also responsible for fixing production defects.
- Implemented Apache DataFrame over RDD in existing Projects. Optimizing existing Spark Jobs using Spark-SQL, DataFrame and RDD.

ACHIEVEMENT

Filed an U.S. Patent

SYSTEM AND METHOD FOR AUTOMATED PLANNING OF NEXT GENERATION TELECOM NETWORK

The present disclosure provides the planning of the next generation network which complements an existing telecom deployment to achieve the desired KPIs from the combined network for both macro and small cell planning in an existing network in a cost- effective method to deploy ODSC cells and Macro Cells in a heterogeneous network
